About State of Iran Survey Series

The “State of Iran” survey series is designed to track the trends regarding Iranian people’s attitudes towards the foreign policy, nuclear deal, and Iran’s state of economy.

All waves of the survey are collected by IranPoll utilizing its standard nationally probabilistic method as detailed in this document. Waves of Apr and Dec 2018 are exclusive to IranPoll. Other waves were collected for the [University of Maryland Center for International and Security Studies \(CISSM\)](#). CISSM was responsible for designing the questionnaires, getting feedback on them from relevant policy experts and practitioners, performing the analysis, and putting together the final reports which are available publicly [on CISSM website](#).

Survey questions in Dec 2018 wave are - approximately - 24% on Economy, 28% on International Relations, 28% on Nuclear issues, and 20% on Security as summarized in the table below:

#	Question Subject	Topic

About IranPoll®

IranPoll is an independent full-service opinion research firm focusing exclusively on Iran. A division of People Analytics Inc., IranPoll relies on its vast survey capacity to conduct and collect polling data from Iran using various modes of data collection including face to face, telephone polling (including a monthly Omnibus), in-depth interviews, focus groups, and online panel (B2B and 51k-member B2C).

IranPoll operates multiple call centers with a total of 87 active calling stations conducting over **160,000** probabilistic interviews per year in Iran. Building on the in-depth local knowledge of its team of experts, IranPoll solely relies on methods that could be objectively verified and independently replicated.

Being authorized by the United States Department of the Treasury Office of Foreign Assets Control (OFAC) to “to engage in all transactions necessary to facilitate and pay for” opinion research, IranPoll has been using its extensive research capabilities to provide opinion research services to a wide range of clients including Princeton University, Cornell University, University of Maryland, UCLA, Rice University, Ohio State University, BBC, euronews, Gallup, IPSOS, GfK, Kantar, Lightspeed, Qualtrics, YouGov, Harris Poll...

Complementing its extensive field capacity, People Analytics Inc. is the developer of VoxSurvey, which is an online governed data sharing and visualization platform. It allows polling data owners to provide governed data access to users with defining access-level configuration per data point. The database currently contains more than 3,000 questions on 430 topics and subtopics from more than 300 probability sample surveys conducted from 2006 to 2019.

IranPoll is a member of ESOMAR, American Association for Public Opinion Research (AAPOR), MRIA, and WAPOR and follows their industry standards.

Methodology and Sampling Steps

Data presented in this survey were collected through telephone interviews of 1,017 Iranians during December 4 - 12, 2018. The sampling margin of error was +/- 3.1%.

Our sampling methodology for CATI uses a nationally representative probability sampling method which is both simple and robust:

1. The sample is allocated to all 31 Iranian provinces in accordance to their population size.
2. All settlements within each province are categorized into seven population groups, one group for all rural settlements and six groups for urban settlements.
3. The sample allocated to each province is distributed among each of the seven population groups relative to each group's population size relative to the population of that province.
4. One settlement within each of the seven groups is randomly selected and the interviews allocated to that group are conducted in the randomly selected settlement.
5. After fixing the list of area codes and telephone exchanges for landline telephones in each of the randomly selected settlements, Random Digit Dialing (RDD) is used to reach random households.
6. When a residence is reached, a qualified respondent is randomly selected from within that household, often using the random table technique.
7. An initial attempt and at least two callbacks are made in an effort to complete an interview with the randomly selected respondents.
8. All of the interviews are conducted in a centralized call centers, all interviewers are continuously monitored, and all interactions are recorded for quality control purposes.

It's not easy conducting opinion polls in Iran. But IranPoll has a good track record by using anonymous phone surveys. It has accurately predicted presidential election result.

Call Center Languages

IranPoll is unique in that unlike most other fielding agents who only use interviewers fluent in Farsi (Persian), which is the native language of only about 55% of Iran's current population, it uses interviewers fluent in the vernaculars of various regions in Iran. This allows IranPoll to more effectively communicate survey questions and accurately record obtained responses.

Our call centers are staffed with interviewers' native in the following ethnic languages and dialects of Iran:

- Persian/Farsi
- Azerbaijani
- Gilaki
- Mazandarani
- Kurdish
- Luri
- Arabic
- Balochi
- Turkmen
- Tat

Phone Coverage in Iran

Phone survey is a strong mode of data collection in Iran, as the response rate IranPoll obtains is very high (around 86%) and the phone penetration in Iran is almost universal.

Based on the 2013 report by “Statistical Centre of Iran”, about 98% of Iranians households (22.3 million) had access to telephone (fixed or mobile cellular telephone or both) at home. These shares were 99% for urban and 94% for rural households. 5% had a fixed telephone only, 1.5% were with a mobile telephone only, and 91% enjoyed both fixed and a mobile telephone.

	Total	Urban	Rural
Households with a telephone	98%	99%	94%
• Fixed telephone only	5%	5%	6%
• Mobile cellular telephone only	2%	1%	3%
• Both fixed and mobile telephone	91%	94%	84%
Households with a computer	46%	54%	23%

IranPoll's CATI, Proven to be Predictive

IranPoll is proud of providing a fully accurate prediction of the outcome of Iran's May 2017 presidential election.

Our prediction from May 16, 2017 (3 days before the election), was published by The Economist about 20 hours before the initial official results were declared. (accessible here: <https://www.economist.com/blogs/graphicdetail/2017/05/daily-chart-14>)

On May 20, 2017, Iran's Ministry of Interior officially declared that Rouhani had won 57% and Raisi had won 38% of the cast ballots. As shown in this image from The Economist, our prediction was less than 2 percentage points away from the officially declared results.

Please find more about our election polls [here](#).

The Washington Post

"IranPoll series has become one of the best snapshots of public opinion in Iran over recent years, with its polling predictions for the May 2017 presidential elections accurate within less than 2 percentage points."

DK/NA [vol.]	4.4	5.4	5.9	4.1	4	8.4

Q10. Are European countries moving as rapidly as they can to trade and invest with Iran now that some sanctions have been lifted, or are they moving slower than they could?

	Dec. 2016	May 2017	Jan. 2018	Apr. 2018	Dec. 2018
They are moving as rapid as they can	19.2	17.8	16.8	13	11.8
They are moving slower than they could	70.3	71.3	73.0	78	81.2
None of the above/ other [vol.]	1.1	1.0	1.4	1	.8
DK/NA [vol.]	9.4	9.9	8.9	8	6.2

[Q11 asked only of those who said the Europeans are moving slower than they could in Q10]

Q11. In your opinion, are European countries moving slower than they could to trade and invest with Iran mostly because of:

	Dec. 2016	May 2017	Jan. 2018	Dec. 2018
Iran's own weak business environment	18.6	19.3	13.4	11.5
Pressure or fear of the United States	78.7	75.3	83.4	85.2
None of the above/ other [vol.]	.9	2.1	1.5	1.4
DK/NA [vol.]	1.8	3.3	1.6	1.9

¹ Previous waves asked about other P5+1 countries besides the United States.

Q12. Thinking about how the JCPOA has worked out so far, which view is closer to yours?

	January 2018	Dec. 2018
The JCPOA experience shows that it is worthwhile for Iran to make concessions when negotiating with world powers because through compromise Iran can negotiate mutually beneficial agreements with world powers.	21.9	22.3
The JCPOA experience shows that it is not worthwhile for Iran to make concessions when negotiating with world powers, because Iran cannot have confidence that if it makes a concession world powers will honor their side of an agreement.	67.4	72.4
It is too early to tell [vol.]	.1	1.1
Other/Depends [vol.]	1.1	1.2
DK/NA [vol.]	9.6	2.9

Q13. In your opinion, how important is it for our country to develop missiles? Is it:

	January 2018	Dec. 2018
Very important	73.8	76.3
Somewhat important	21.1	19.5
Not very important	1.7	1.5
Not important at all	2.3	1.8
DK/NA [vol.]	1.2	.9

[Only asked from those who say it is “important” for Iran to develop missiles in Q13]

Q14. Why do you think it is important for our country to develop missiles? [Open-ended]

	January 2018	Dec. 2018
To maintain/increase Iran’s security	14.8	15.1
To increase Iran’s power	3.9	1.1
To increase Iran’s defense and military capabilities	8.4	5.2
To defend Iran against its enemies	32.7	36.2
To defend Iran in case of a war	9.7	10.7

DK/NA [vol.]	4.1	2.2	4.5	1.7	2.3	2.5

Q16. Some people say that going forward, Bashar Assad should not be allowed to remain President of Syria because he is an incompetent leader who used excessive force against Syrian civilians and let ISIS gain control of territory. Others say that Bashar Assad did what was necessary to keep Syria together and whether he remains the president of Syria should be decided by the Syrian people. Which view is closer to your perspective?

	January 2018	Dec. 2018
Bashar Assad should not be allowed to remain President of Syria	9.2	8.9
Syrian people should decide whether Bashar Assad remains as President of Syria	84.0	83.6
